## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, see pages 7-14, filed 11 September 2006, with respect to the rejections under 35 USC §103(a) have been fully considered and are persuasive. The rejections under 35 USC §103(a) listed in the previous office action, mailed 12 June 2006, have been withdrawn.

### *Allowable Subject Matter*

2. Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 8 each recite the automatic selection of a transform from among a plurality of sigmoidally-shaped curves in order to prevent clipping. The sigmoidally-shaped curves have the attributes of (1) curve lengths, (2) sharing a common midpoint, and (3) not being collinear for more than half their curve length. Especially with respect to attributes (2) and (3), this particular set of sigmoidally-shaped curves used as color adjustment transforms to prevent clipping has not been found in the prior art, nor have references been discovered which would render this feature obvious to one of ordinary skill in the art at the time of the invention. The closest prior art references found are the prior art references already cited by Examiner, namely Taguchi (US Patent 5,937,232) and Hirota (US Patent 5,973,802), which do not teach all of the features of the plurality of sigmoidally-shaped curves. Thus, claims 1 and 8 are considered allowable. Claims 2-7 and claims 9-10 are considered allowable due to their respective dependencies.

Independent claim 11 recites that the color is boosted and a transform is selected from transforms which have (1) a length including a midpoint of the length, (2) share a common midpoint, and (3) are a difference function of two exponential function. All three of the attributes of the transforms available for selection are not found in the prior art so as to be obvious to one of ordinary skill in the art at the time of the invention. Thus, claim 11 is considered allowable. Claims 12-19 are considered allowable due to their respective dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
